Spire Metering Technology

Hello John,

It was good talking with you today about your application and thank you for your interest in the ACAM product line. Attached is your quote for the GP22 Evaluation Kit that you were interested in. Price of the kit includes 4 hours of technical support, which is usually sufficient for getting all your evaluation completed. I verified with Norbert before our call that the production GP22 Evaluation Boards have come in, so this is a production kit now.

We have a local Manufacturers Rep in Massachusetts. Innovatech can offer local sales assistance and service. Since our discussion is confidential, I will just let them know that you have general interest in the ACAM parts and they will just provide their contact information to you.

I will follow up to make sure you received your quote and to see if you have additional questions. If you have any questions or need technical assistance, please let me know. I look forward to working with you.

Thank You,
John

John Monteith
